REASONS FOR ALLOWANCE

1. The following is a statement of reasons for allowing claims 1-3 and 5-20:
2. As recited in the amendment submitted on 04 November 2004 ("the last amendment") in response to the final action dated 29 October 2004, the base claims—i.e., claims 1, 11 and 13—cover the following:

Claim 1 covers an apparatus comprising:

- a) a substrate with a deposition region and an optional uncoated region, with the deposition region including a level intermediate region between first and second end regions, the first end region including a first raised surface portion extending above the level region circumferentially around the first end region, wherein the first raised portion extends above the level region by 0.5 to 1,000 micrometers; and
- b) a dip coated layer over the entire deposition region, including the raised surface portion.

Claim 11 covers an apparatus comprising:

- a) a substrate with a deposition region and an optional uncoated region, with the deposition region including a level intermediate region between first and second end regions, the first end region including a plurality of raised surface portions, each of which extends above the level intermediate region and partially around the first end region, wherein the plurality of portions, when viewed as a substrate end view, collectively extend circumferentially around the first end region continuously; and
- b) a dip coated layer over the entire deposition region, including the plurality of raised portions.

Claim 13 covers a coating method comprising:

1) providing a substrate including a deposition region and an optional uncoated region, with the deposition region including a level intermediate region between first and second end regions, the first end region including a first raised surface portion extending above the level region circumferentially around the first end region; and

2) dip coating a layer of coating solution over the entire deposition region, including over the raised surface portion.

3. The prior art of record fails to teach or suggest apparatuses or processes having all of the features of claims 1, 11 or 13, as summarized above.

4. The last amendment overcame the 35 USC 103 rejection based on CH-672564A's abstract and Herbert (US 5,683,742).

5. The disclosures of the pregrant publications listed on the 18 August 2004 citation sheet (copy enclosed) have been considered.

6. Claims 1-3 and 5-20 are patentable over these disclosures because the coating operation covered by this case is directed to a one-step coating for the entire apparatus; and the apparatus claimed here has raised end regions, not recessed ones.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
